EDUCATION

Northeastern University, Khoury College of Computer Sciences
Computer Science and Philosophy, May 2025

Sept 2021 - May 2025
Boston, MA

EXPERIENCE

Commonwealth of Massachusetts

Sept 2025- Present

Artificial Intelligence Specialist/Developer

Remote

- **Leading execution of 5 AI products**, including GENIE, Massachusetts' first enterprise Generative AI platform, and multiple internal chatbots that streamline HR and IT policy workflows across state agencies
- **Operating as both Product Manager and Developer**, defining product vision, scoping MVPs, prioritizing roadmaps, and driving agile delivery while **managing and mentoring 3+ interns**
- Driving statewide **rollout strategy, risk assessment, and governance alignment**, coordinating across secretariats to establish responsible, scalable AI adoption within government operations

Commonwealth of Massachusetts

Jan 2025- Aug 2025

Artificial Intelligence Intern

Remote

- **Owned end-to-end product development for GENIE**, Massachusetts' first Generative AI platform, delivering secure, compliant AI access to **44,000+ public sector employees**
- **Architected backend document retrieval and ranking improvements**, increasing response relevance and accuracy by **~60%** across production queries
- **Designed, built, and launched a Retrieval-Augmented Generation (RAG) chatbot** to centralize technical and security policy guidance, significantly reducing compliance-related support requests across departments

Burnes Center for Social Change

July 2024 – Dec 2024

Product Developer- Generative AI

Boston, MA

- Led full-cycle development of an **AI-powered knowledge base** for the Executive Office of Economic Development (EOED), enabling small businesses to seamlessly **access 50+ grants/programs** from the state of Massachusetts.
- Designed and implemented a **Retrieval Augmented Generation (RAG) backend architecture**; designed and deployed RESTful APIs using AWS API Gateway and Lambda, integrating with microservices for scalable backend processing
- Conducting **comprehensive user research** through interviews and synthesized findings into actionable product features, driving user-centric design; producing memos to communicate key insights and progress to stakeholders

Amazon Robotics

July 2023 – Dec 2023

Software Technical Program Manager

North Reading, MA

- Orchestrated deployment automation of **16 new robotic arms**, led meetings with stakeholders and worked cross-functionally among various teams to ensure robotic arm production increased to **8x the previous speed**
- Established and scaled a **new Scrum process** for the Robotic Orchestration and Controls team as a program manager at the intersection of software and hardware, doubling deployment frequency and reducing bottlenecks
- Created tool utilizing **AWS Lambda/Python** to develop script that performs real-time analysis of robotic arm collisions, eliminating manual data retrieval and **improving incident response speed by 2x**
- Delivered user manuals and led hands-on training for new hires, enabling smooth adoption of workcell operations

EXTRACURRICULARS

Code4Community | Director of Product

Sept 2022 - April 2025

- Oversaw the development of **7+ products**, drove strategic alignment, and ensured milestone adherence
- Scoped and defined all new product initiatives, onboarded **4+ new products**, translated problem statements into actionable product requirements, feature sets, and development roadmaps
- Mentored, coached, and recruited **10+ new product managers**, providing hands-on guidance in **Agile development, prioritization, and stakeholder communication**

SKILLS

Technical: Python, Javascript, Typescript, Java, R, HTML, CSS, SQL, AWS Services, [React.js](#), Nest.js

Tools & Methodologies: Agile/Scrum, Jira, Confluence, AI Product Development, Product Management, RAG
